

**Bio** – My name is Keevah Duckworth and I am a Training & Support Executive at GBG within our Trace & Investigate department. I have worked at GBG for 4 years now, starting in a sales role focusing on Internal Employment checks, before moving in to ID Verification. I made the move to Training & Support just over a year ago and am now responsible for supporting new and existing clients and ensuring they understand how to use our Connexus platform by delivering them high quality training either via the web or face to face.

**Visualise by Connexus** – GBG's cutting edge, time saving visualisation tool - helps to identify links and patterns in an investigation as well as navigating through a large maze of data. Search by name, email address or phone number, and see instantly how that record is associated to other pieces of data. Linking people, places and businesses will give an immediate insight into an investigation, by viewing a complete picture of the individual, in order to make business critical decisions faster.
