Tony's career spans over 35 years in law enforcement and investigation, finishing his career with the National Cyber Crime Covert Support unit managing complex cyber investigations effecting the UK.

Tony has a wealth of investigative experience as a Detective with the National Crime Squad, Serious Organised Crime Agency and National Crime Agency.

Tony was an armed surveillance officer specialising in covert rural observation posts (CROPS) and was one of a small cadre of officers trained as an armed courier for the delivery of ransoms. Tony was an experienced Test Purchaser within law enforcement.

Tony now carries out online investigation for UK and international clients investigating such things as romance frauds and the theft of cryptocurrencies. He also conducts due diligence for investment companies and on-boarding research. He carries out trademark and intellectual property investigations as well as evidential purchases.

Tony's last post within the Covert Support Unit was internationally recognised as a centre of excellence for online undercover policing. Resulting in Tony training other agencies around the world.

Tony is an internationally recognised trainer in all things OSINT and trains military, govt. agencies and commercial organisations around the world. He is currently providing Investigator specific OSINT 4-day courses available for delivery around the UK.
